PROJECTS

Weather Dashboard (HTML, CSS, JavaScript)

- Built a weather app using the OpenWeatherMap API with current conditions, a 5-day forecast, and °C/°F unit toggling.
- Developed an interactive Leaflet/OpenStreetMap “Explore Weather” map with temperature-coded pins for popular and previously searched cities.
- Added location-aware autocomplete, filterable search history, and a 5-language UI (English, Spanish, Chinese, Hindi, Arabic).

Trip Planner (Next.js, TypeScript, Tailwind CSS, Supabase)

- Built a full-stack trip-planning app with authentication, trip/stop management, and per-trip weather forecasts, deployed live on Vercel.
- Designed a 3D carousel UI for browsing 500 travel attractions across 50 countries, with a dual-currency budget filter and live city autocomplete.
- Hardened the app through security, performance, and accessibility passes, including input validation, ownership checks, and a CI pipeline.
